Yet again, another night of extreme weather, this time of the hot variety. My apologies for not judging how slow the high summer conditions would make the area, and to subjecting most of you to 45 minutes more pleasure than you were anticipating.

As I write this, I have in front of me some results from 1993, the last time Cong Burn was used. It was a colour coded event, the winner of the Brown course (7.5km, 180m, 18 controls) was A.Barnes taking 56:14. I'm too modest to say who won the Blue course (6.0km, 180m, 17 controls), but the time was 58:41. Unfortunately, I was looking at these results when I planned the courses for this event, so I was thinking that a 6.0Km course would probably take about 45mins for you modern set of experts. Of course, the 1993 event took place near the end of February, not at the beginning of July.

If we use the venue next year, I'll try to get it earlier in the calendar. Look at it as having been good practice for Scotland!

This marks the end of the Not The Great North Forest Evening Event series (not before time do I hear you cry?). Thanks for participating.
