Planner comment's - Dave Caudwell*Why Bewick Moor and not Allen Banks as advertised?*

This was for a number of reasons. Firstly, the PG plot we purchased for over £600 was the very worst (by a huge margin) of PG plots I've ever tried to work with, and as the date for the event approached, it became clear that I would be hard pressed to produce a decent map. Secondly, some parts of the area promised to be rather better than they actually turned out to be. Thirdly, the area became further restricted when some of it was declared out of bounds due to pheasant rearing activities (after I'd mapped it, naturally). Fourthly, there were only 2 crossing points available to us over the river Allen, and my attempts to produce longer courses left much to be desired, I felt. So all in all, 4 weeks before the event I thought that we needed to relocate to a NN area big enough and good enough to stage it, and one which we hadn't recently used while there was still time to do something about it. The only venue we had at our disposal was Bewick Moor.

Why was Bewick Moor so tough?

We haven't used the area for some time, and never before in Autumn, so it came as a bit of a shock to find that the bracken was so extensive and also high (although this eventually didn't cause so many problems as we thought it might when it started to die off rapidly), that the marshes had become tussocky, and that the heather was so deep in places. We soon decided that the M21's who had skipped round their course doing 5 minute K's in the Spring of 1997 at our last National Event here wouldn't be able to repeat that this time, and reduced the course lengths appropriately. The Estate told us that they now received a grant not to cut or burn the heather to the same extent as previously (it hasn't been used for grouse shooting for some time, so that was no great hardship for them), so there's the reason for that, and maybe the marshes grow the way they did in very wet summers like the area has just had.

Despite all this, I still think that changing the venue from Allen Banks to Bewick Moor was the correct thing to do, and you all deserve great praise for coping with the conditions you found there.

Remember the great views of Hedgehope and Cheviot in the superb weather.
