NEOA Colour Award Scheme

Members of NEOA may purchase the relevant colour badge on completion of three NEOA events (one may be from outside the area), finishing above the colour line.

For further details, contact - Margaret Crosby

Email - nsoa@hotmail.co.uk

The Navigation Challenge:

BO members are eligible for a Navigation Challenge certificate after successfully completing 3 colour coded courses at the same Technical Difficulty (TD) standard. The certificates are 'star' based e.g. 1 star for TD 1 up to 5 Star for TD 5.

The Racing Challenge:

BO members are also eligible for a Racing Challenge certificate after successfully completing 3 colour coded courses (of the same TD) within the following times:

Gold award - Participants time < Course length (km) x 12.5 mins

Silver award - Participants time < Course length (km) x 15 mins

Bronze award - Participants time < Course length (km) x 20 mins

Receiving Your Certificate

The certificates will be automatically generated via the results that clubs have uploaded into the BO website. They will be available for you to download via the members area of the BO website.

Planners Comments - *Rob McKenna*

Many thanks for all turning up and making this a reasonably successful event. We were very fortunate with the weather given the past bouts of snow and poor forecast for the event - although it was rather chilly standing around, it was probably good conditions for running. I hope that you all enjoyed the challenge set for you.

We have not used Chopwell for some time and at this time of the year the wood does look very open. However, although the FC has been doing quite a lot of thinning in places, the brambles can be rather nasty if you get caught in them and unfortunately the openness will encourage their growth.

Some of you may have thought that a few of the controls were not that technical, but the main criteria was to ensure that the EMIT equipment was going to be fairly secure. I opted to use the 'compact' permanent course sites for controls 1 to 20 as these had a metal post to attach the control box to. I hope that you enjoyed using the new EMIT 'touch free' system - it does have a lot of advantages over SI.

Unfortunately one or two of the permanent course markers were not quite positioned correctly by the FC so an adjacent tree was used.

However, these were all fairly easy to find but the challenge was how to get them. The addition of controls 21 to 32 did make the possibility of collecting all the controls very difficult in the time given. So the choice of collecting all the easy low score controls had to be balanced against getting the higher point ones, which made for some good competition.

Looking at the results there were a number of route choices employed and it appears that the higher point controls seemed to be a big attraction to quite a few competitors and some of the less experienced where caught out with the time limit.

Thanks to David Brook for quietly keeping me right and thoroughly checking that everything was in place. Also a big thanks to the organising team lead by Boris and the the small band of helpers who volunteered to collect the controls in.

Congratulations to all the class winners - I shall be printing off certificates shortly and distributing them at events in the future.

Controllers comments - *David Brook (NN)*

Thanks to everyone for turning up to the event and well done to all the class leaders - comments at the finish suggested that most of you enjoyed the challenge. I firmly believe that score events should make it very difficult or impossible to collect all the controls and Rob's courses and control positioning ensured that no-one did. The points available at each control also play an important role and several competitors were tempted by the 25-pointers, a few reaching all four. Simply collecting the 20 ten-pointers and a couple of other nearby controls could have resulted in a top ten position!

The map of Chopwell is now rather dated and there was little time to do more than correct the more obvious changes. It remains a good forest for orienteering, but the brambles are a real menace and path routes are often quicker. Just two weeks before the competition, the car park was covered in ice and there was a foot of snow in the higher parts of the forest, so it was a relief that the thaw arrived in time.

Finally, congratulations to Rob for his planning and Boris for a smooth organisation. I had not seen the contactless Emit system in operation previously, but it worked well and competitors seem to like it.
