Planners comments – Nick Lord

Idyllic weather does add a great deal to an orienteering event as many people commented, particularly those competing the previous weekend. One or two people were unaware of the second set of master maps so I hope the blue sky made up for it. However, despite the large number of scores on 180 (the maximum score on the first 18 controls) all but one finished with less than 5 minutes to spare. Those athletic mathematicians will have noticed that the penalty (3 points per minute) was not severe enough and indeed the second set of controls was 'worth' 40 minutes (120 points) running time! However some 65% arrived back within the hour. On reflection my fears of Guards not being large enough were unfounded and breaking the controls into two parts was perhaps unnecessary. Nevertheless most people seemed to have enjoyed themselves and there were few complaints.

Out of interest, where the scores are equal I have listed the results in terms of finishing time and I have also included the time penalty. Finally thanks must go to the various landowners for their permission to use the area, to helpers – Ralph, Bob, the Morgan family, Fred, David, Barbara, Simon, Don, Tricia, My wife and the boys and girls of Mowden Hall School, and lastly to my better known namesake for providing the sunshine.
