**Organiser's comments - Boris Spence**

There were a few problems with the EMIT equipment which I must apologise for. Although all controls had been thoroughly checked before the event, control #168 went down shortly after the start of the event which affected most competitors and those affected have been credited with this control. Another control had been changed before the event but unfortunately had not been changed on the computer but this is reflected in the splits. The control concerned was #182 which was replaced by #150.

Many thanks to Mike Hardy for co-ordination with the relevant authorities, also to Jacqui Toase and Victoria Stamp from Durham County Council, to Adam Grant from Durham University, John Holmes from Durham Cathedral and to the University Orienteering Club for the use of the map.

**Planner's comments - Kate Hampshire**

I very much enjoyed planning this event. Durham City has a great combination of intricate urban orienteering, with plenty of alleyways and vennels, plus some nice woodland along the river banks for a bit of contrast. I tried to plan all the adults' courses to cover a mix of terrain, while the junior courses stuck to the area around the Cathedral, away from the river, roads with traffic and areas where Saturday night revellers might be hanging out in large groups! I wanted to include some interesting route choice on all the longer courses, and various competitors' comments and discussions after their runs, comparing routes and times, suggested I achieved this to some extent at least. My impression on the night was that people had a good time, and I was very happy to see lots of Durham University students participating. I would like to see a Durham City night race become a regular part of NN's annual event calendar.
