Controller's comments - Rob McKenna

The club held its annual charity event at Houghall Woods today on a brisk winters day and things seemed to be going well until the first competitor came to download.

The EMIT 'touch free' system was being used with a set up allowing us to have a mass start which was being tested by us for the first time.

This involved competitors entering an inductance loop which should have acted like a start box in that it cleared the tag and once a competitor left the loop the timing would start.

This was the theory and it had worked well for standard events, but unfortunately, for some reason failed this time.

After seeking advice to resolve the situation, it appears that a setting on the inductance loop control unit had not been set correctly which resulted in EmiTags not being properly cleared or started.

This resulted in an almost unreadable set of split time results on the day. We must apologise for the lack of results and hope this did not spoil your run on the day.

Following a plea on the NN website I have managed to compile a few results shown above.

If you made a note of your finish time and list of controls you visited could you please email them to me, Rob McKenna, (robmckenna@blueyonder.co.uk) and I will update these results.

Well done to Duncan Archer of CLOK who managed to visit all 33 controls in about 48 minutes.

Notwithstanding the problems and many thanks to your generosity we were able to raise £276.50 from the proceeds of the event which are to go to St.Cuthberts Hospice, Durham.
