Certificates are available for both long and short class winners, which will be posted out shortly.

If the winners could email the organiser (see below) with their postal address it would be most appreciated.

For further details on mis-punching please see individual results in class and course format for each day.

Officials

Organiser - Boris Spence

email - borrispence@aol.com, tel - 01670 860897

Planners - Kath Marshall-Ivens (day 1), Julian Warren (day 2)

Controller - Adrian Barnes (NATO)

Planner's comments (day 1) - *Kath Marshall-Ivens*

I would like to start with a few thank yous, to Rob and Boris for putting the controls out for me on the Friday and to Adrian for all his help and support (I haven't done much planning) in the lead up to the event and on the day. I heard plenty of favourable comments about the courses and I think generally they were well received, though perhaps there was a bit too much track running for some. I tried to avoid the worst areas of forest and make sure all courses had a variety of route choices and leg lengths but unfortunately I think this often meant the fastest route was along a track rather than in a straight line.

Controller's comments - *Adrian Barnes (NATO)*

Congratulations to Northern Navigators for managing to put on this event in a short time after permission was withdrawn for their original area.

I recommended to British Orienteering's Event and Competitions Committee that they use these areas despite their previous use quite recently. For a Level B event areas should not have been used within the last 12 months. I did that because I believe the areas are of a quality for a Level B event. Thankfully ECC agreed and the event went ahead.

From the comments I heard you also agreed and enjoyed your runs. Now, there was some debate on Day 1 about controls 220 and 225. Comment was passed about the controls being misplaced or that the map was wrong. Having checked that area of forest (not under competition pressure), more than once, I am convinced that all was well. From the forest above (south of) the controls all the re-entrants and gully are very clear and well portrayed on Dave Caudwell's original mapping. It is less clear from the path below them as the slope rises very sharply and it is not as easy to see the land forms.

Both maps are, unfortunately, showing their age and there was not enough time for a full update. I'm sure Rob was sick of me pointing out bits that essentially needed changing on the Low Redford map - new mountain bike paths and self-seeded thick trees severely reducing the run-ability in places. He did a great job for you in a very short space of time. He also managed to get time to update the vegetation around the final few controls for Day 2 as well. Again self-seeded Birch trees caused the run-ability and visibility to be compromised.

The real weakness on the moorland map is that the water features - ditches and marshes - have changed a lot. However, given the time restraints I didn't think that a change would significantly affect navigation. On reflection, the ditches around 131 at the far west end were a bit debateable. The major one running N-S was well incised with running water and most of the others had degraded to linear marshes. However, I did feel that it was still fair navigation if interpreted for what it was from the information given in the final details.

I thought both Planners (Kath and Julian) brought out the characters of the two quite different areas to give you challenging courses. Finally, I really enjoy being involved with events organised by Boris for their military precision - and his ability to influence the weather !! Judging by the horror stories on Saturday from other parts of the country, he is obviously sacrificing to the right weather gods!

Acknowledgements

Many thanks to the Forestry Commission for use of the Hamsterley Forest area.

Also to Bollihope Estates and their Head Gamekeeper, Peter Fawcett for kindly allowing us to use Doctors Gate.
